Conservation Handmade Range

Available in three distinctive colours, created by using a very fine sand.

The Conservation Handmade Black Blend:

A bold, beautiful and sustainable addition to our popular handmade conservation range.

The Conservation Handmade Dark Blend:

A similar warm tone to our popular Conservation Weathered but a shade darker.

The Conservation Handmade Red Blend:

Perfect for vertical tiling especially suited for villages and hamlets with an olde worlde vernacular charm

The Conservation Handmade Weathered Blend:

A natural warm tone, achieving an instant mellow and settled look

Conservation Weathered Blend

**The Conservation Handmade
Weathered Blend**

**A natural warm tone, achieving an
instant mellow and settled look**

**The Conservation Weathered
Blend tile comes with a
Two Nib Feature**

Conservation Handmade Range

Conservation Red Blend

The Conservation Handmade Red Blend perfect for vertical tiling especially suited for villages and hamlets with an olde worlde vernacular charm.

The Conservation Red Blend tile comes with a Two Nib Feature.

Conservation Handmade Range

Conservation Dark Blend

With its natural varying tones, the Conservation Handmade Dark Blend lends itself to a plethora of projects ranging from timeless grade listed buildings to modern day habitable barn conversions.

The Conservation Dark Blend tile comes with a Two Nib Feature

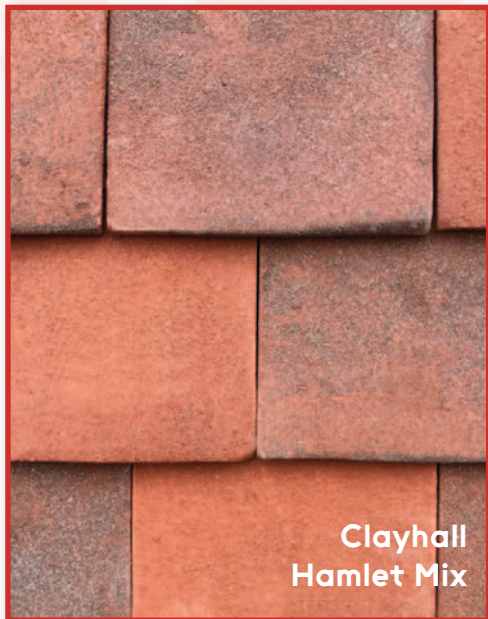

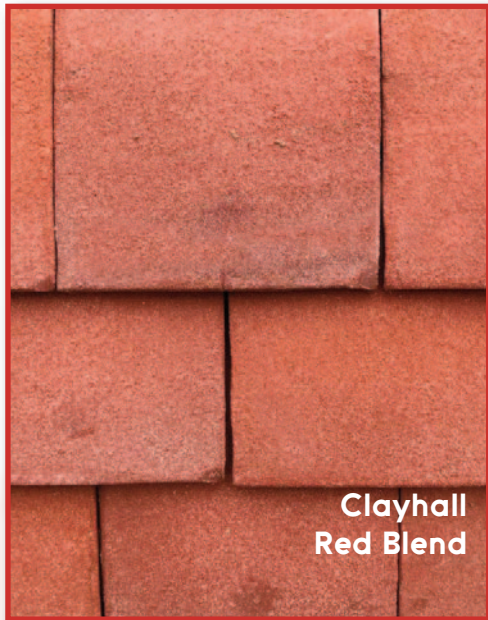

New Conservation Black

*In Stock
&
Available*

A bold, beautiful and sustainable addition to our popular handmade Conservation Range. Produced from natural clay and fired at high temperatures for long lasting strength and durability, each tile is uniquely textured and finished by hand, giving it a character and charm that simply cannot be replicated by mass-produced tiles.

Clayhall Range

Our Clayhall Range consists of the following:

- Clayhall Red Blend
- Clayhall Medium Blend
- Clayhall Dark Blend
- Clayhall Birchwood Mix
- Clayhall Hamlet Mix

The Clayhall Range has been carefully designed
with a continuous nib feature

Clayhall Range

Clayhall Red Blend

A soft and warm hue, ideally suited to main roofs and especially vertical tile hanging.

The Clayhall Range has been carefully designed with a continuous nib feature

Clayhall Range

Clayhall Medium Blend

**An ever popular choice for
a variety of projects.**

**The Clayhall range has been
carefully designed
with a continuous nib feature**

Clayhall Range

Clayhall Dark Blend

A deep dark tonal shade for an instant aged finish

The Clayhall range has been carefully designed with a continuous nib feature

Clayhall Range

Clayhall Birchwood Mix

The Birchwood Mix is part of the Clayhall Range and is made up of

70% Clayhall Medium Blend
30% Clayhall Dark Blend

We supply these pre blended to ensure the correct mix and save time on site

Clayhall Range

Clayhall Hamlet Mix

The Hamlet Mix is part of the Clayhall Range and is made up of

70% Clayhall Medium Blend

30% Clayhall Red Blend

We supply these pre blended to ensure the correct mix and save time on site

Classic Handmade Edwardian

Classic Edwardian

We source only the best raw materials for our craftsmen to create beautifully Handmade Clay Tiles of the highest quality and durability.

The Classic Handmade Edwardian has been designed with a two nib feature bringing versatility and character to all types of pitched roofs.

Bespoke Blend

Creating a bespoke blend from our range of tiles allows the homeowner or specifier the opportunity to put their own individual stamp into their roof design and future home.

Our team are on hand to help with your bespoke blend requirements.

This project required a Clayhall pre colour mix to match with the roofscape of the street.

Clayhall Red Blend
Clayhall Medium Blend
Clayhall Dark Blend

SELECT-A-BLEND

Update mix

 Birchwood Mix Blend	 Hamlet Mix Blend
 Clayhall Medium 35 %	 Clayhall Dark 15 %
 Clayhall Red 0 %	 Classic Edwardian 0 %
 Conservation Red 0 %	 Conservation Weathered 0 %
 Conservation Dark 0 %	 Conservation Black 50 %

When using Heritage Clay Tiles, mixing colours allows you the opportunity to make your roof project unique or where it's a necessity to blend in with surrounding buildings and the local vernacular a bespoke blend can be the perfect option.

Because our strict quality control provides a consistent tile size you are able to mix various styles and colours of tiles to make your roof unique to you. Please use the tool below to experiment with various blends.

3 Piece Bat Tile Set

Available in Medium and Dark Heritage colours the Bat Access Set presents a bat optimised entrance to the under-felt, or to the loft when the under-felt is opened. For use within the roof tiles, the top 'tunnel' tile offers the bat an 18mm high x 165mm long (approx.) tunnel to an entrance hole in the under tiles. This allows the bat to crawl into the roost area.

An advantage of these tiles is that they provide the maximum amount of natural air flow under the tiles. The carefully designed access, along with this air flow between the tiles and the under-felt, aims to provide conditions where the bats are protected from any extremes of heat.

Heritage also offer ridge tiles with a similar 18mm access cut into the ridge tile side, and we can look to manufacture bespoke access tiles to your requirement.

Ornamental Club Tile

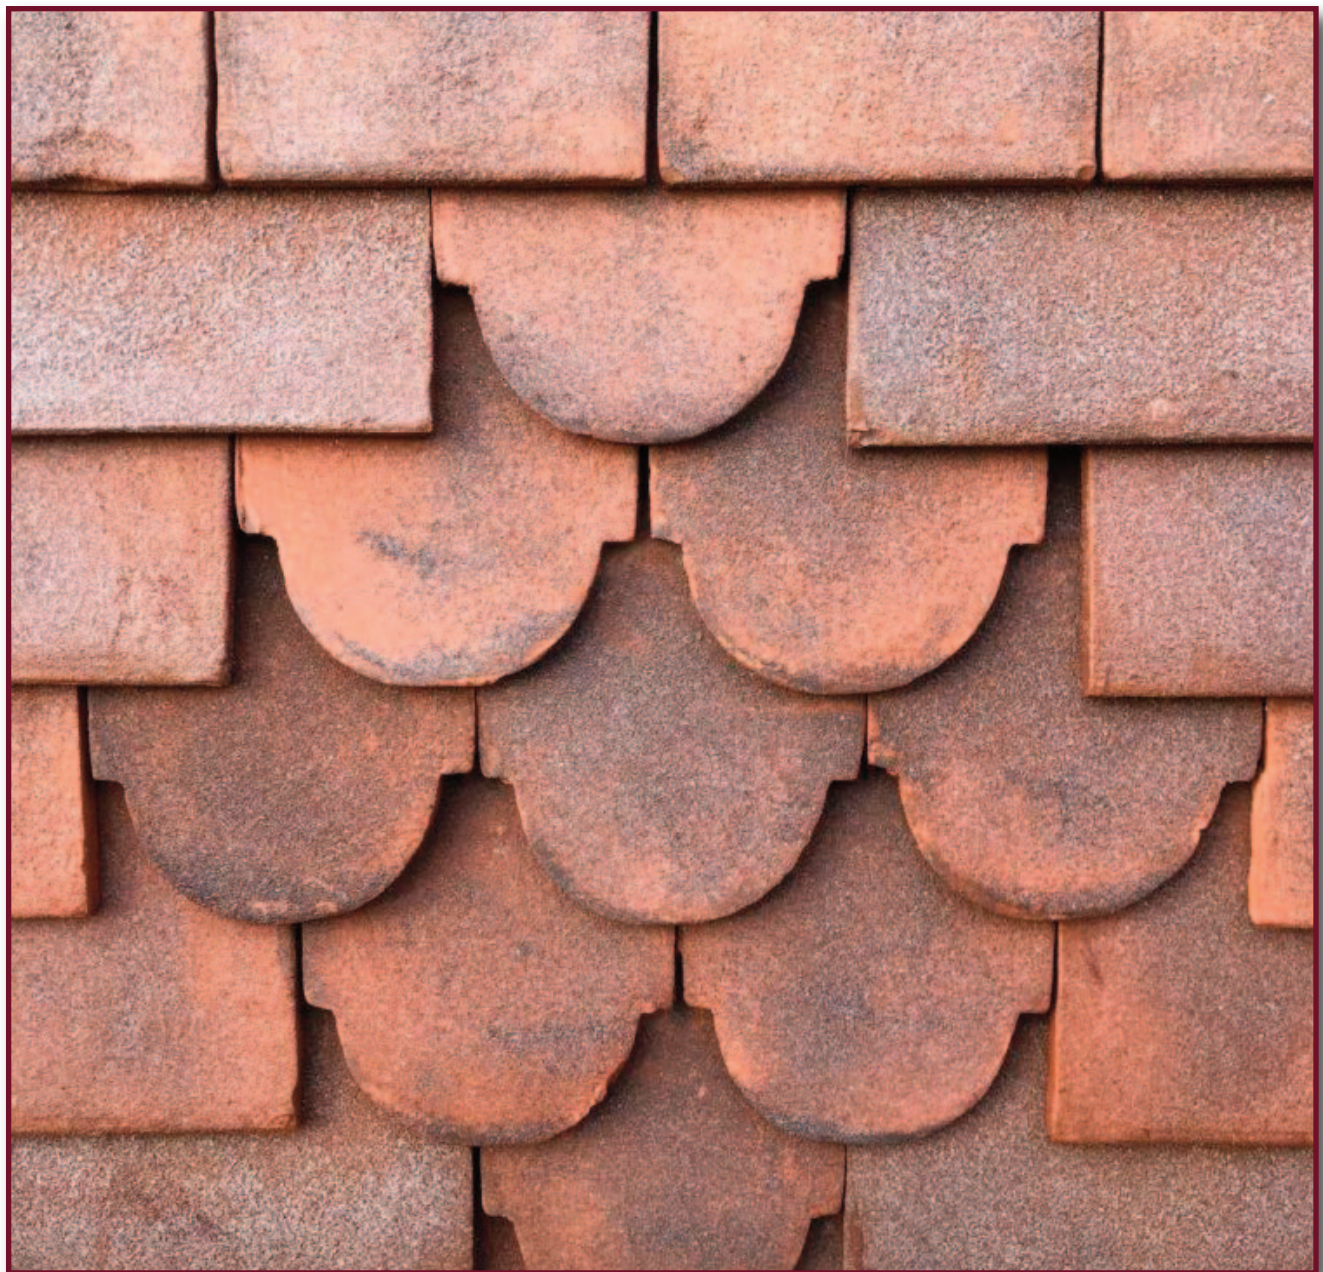

The Heritage Ornamental club clay tiles are available to suit all ranges; Conservation, Clayhall & Classic.

With ornate decorative effects being incorporated into more and more roof designs these days.

Heritage Clay Tiles Ltd offer ornamental club clay tiles with a guaranteed performance in all weathers to 35° pitch. This guarantee is offered across all our ornamental clay tile ranges.

All our ornamental club clay tiles will meet the stringent requirements of BS 5534: 2003 Code of practice for slating and tiling, providing our clay tile fixing recommendations are followed.

Ornamental Club Clay Tiles have been carefully designed with a continuous nib feature which lends itself to design flexibility in main roof and vertical situations

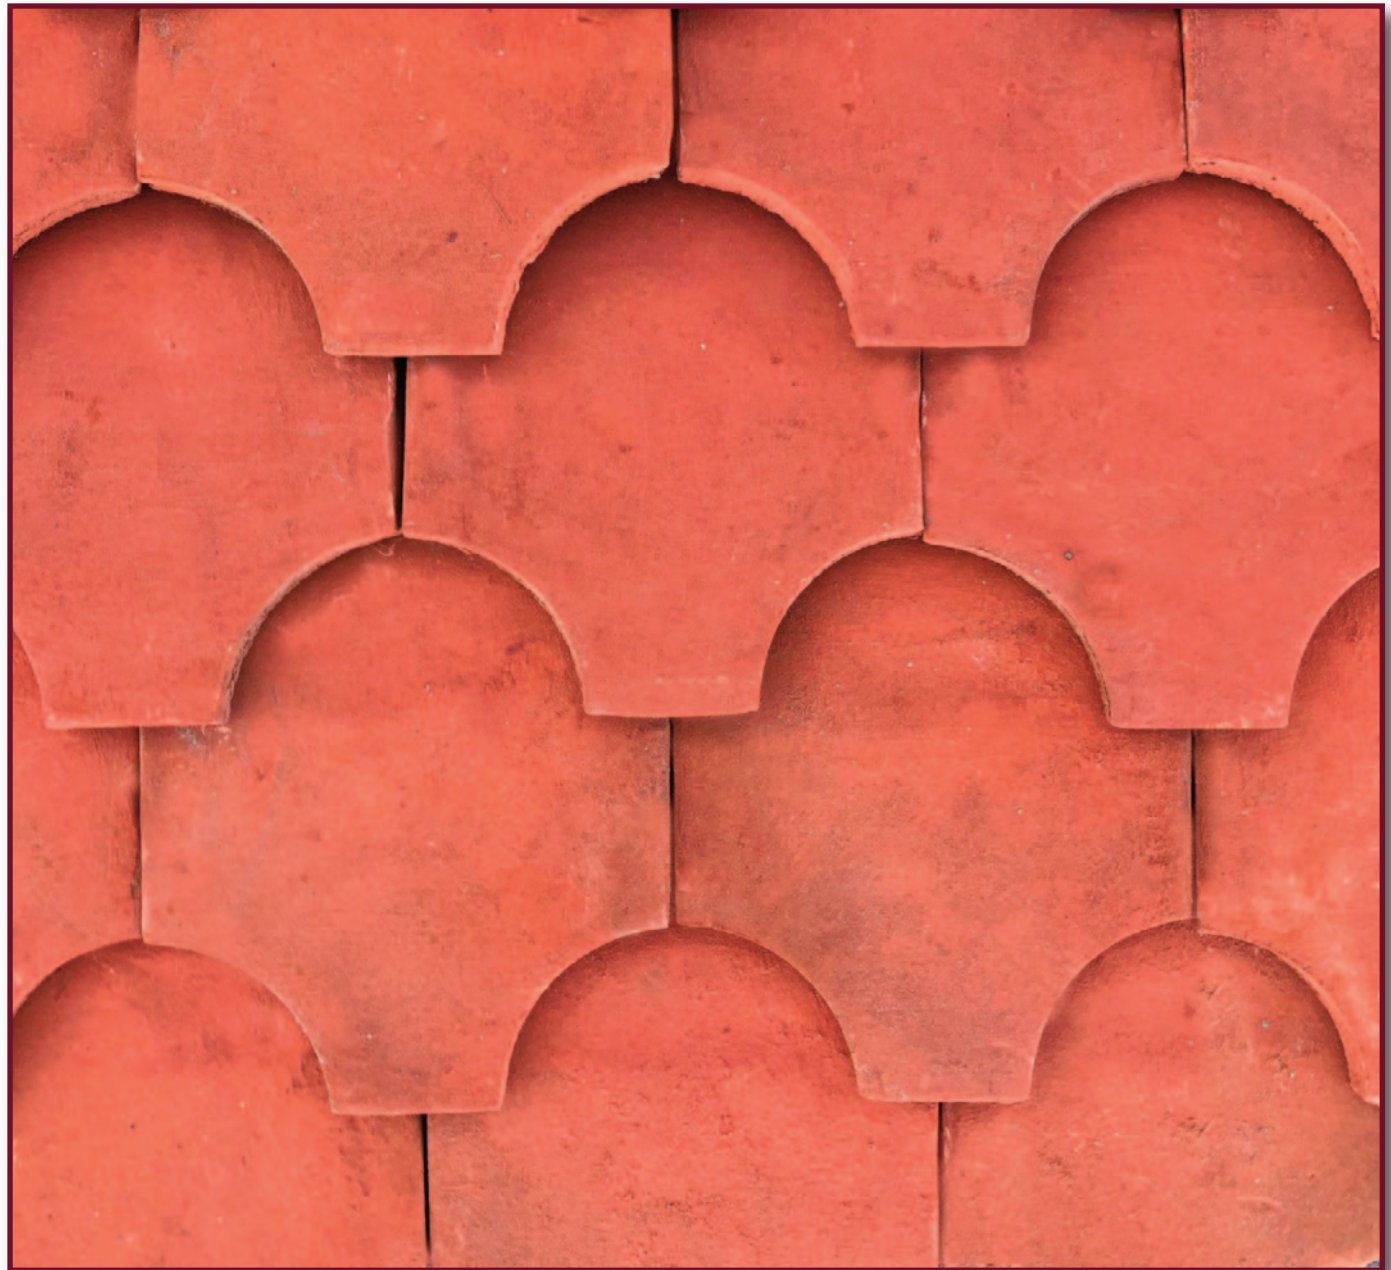

Fish Tail Tile

Ornamental clay tiles were used commonly in the Victorian era where architects used such tiles to add detail and interest to large expansive roofs and vertical tiling.

Generally, ornamental tiles are used to create diamond shapes or laid in a series of bands usually in odd numbered courses.

To create further detail to the roof or vertical area, ornamental tiles can be supplied in contrasting colours to plain tiles to further enhance the visual effect.

The Fish Tail Tile has been designed with a two nib feature bringing versatility and character to all types of pitched roofs.

Glazed Tiles

The Challenge

The Leuven University in Belgium had commissioned a major refurbishment of its main roof. This particular building within the University complex is a UNESCO World Heritage site so it was very important the tile material selected would suit both the original building and the local vernacular.

An additional complication was the tiles used needed to be glazed in different colours to create a coat of arms detail on the roof.

The Solution from Heritage Clay Tiles Ltd

None of the local manufacturers were able to supply suitable products so the Architect contacted Heritage Clay Tiles. We worked closely with both the Architect and the client to guide them through a multi stage selection process. The process culminated with the supply of pre-production RAL colour swatches. The swatches were approved and we produced a pallet of bespoke, glazed handmade tiles which met the exact standards of all the regional authorities involved.

Heritage Clay Tiles project managed the contract closely and liaised with the contractor to ensure the tiles of each colour were delivered on time and in the correct sequence.

The new roof is now complete and has provided the University with a stunning new talking point while respecting the rich history and heritage of the building.

Conservation Handmade Peg Tile

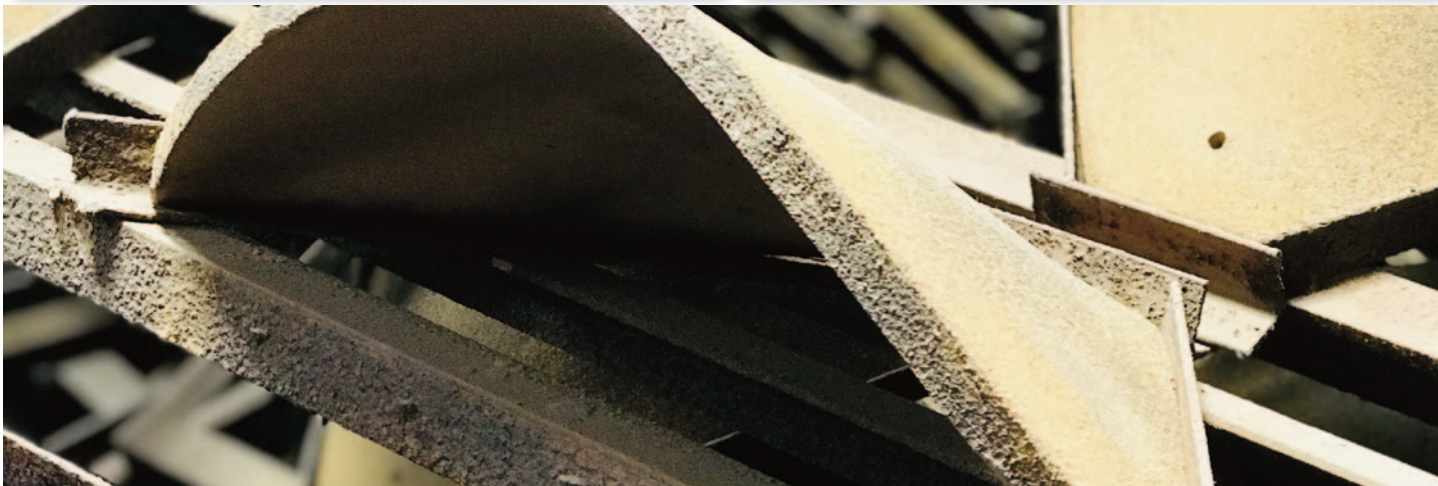

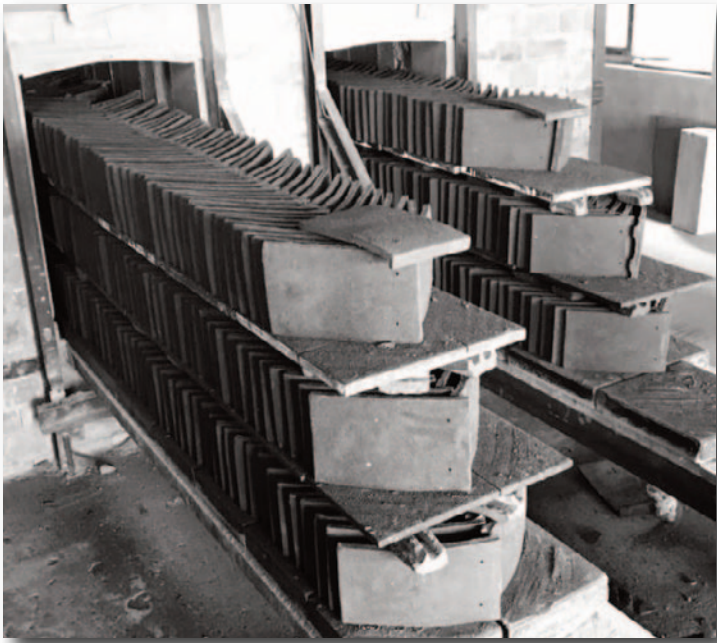

Introducing our Handmade Conservation Peg Tile.

Available in our Conservation Dark colour for a rich and rustic appearance to allow homeowners and contractors to carry out subtle repairs or complete re-roofs for a sympathetic finish.

Release Of Dangerous Substances - NPD

All Heritage Clay Tiles are independently tested and approved by **LUCIDEON** who have over fifty years experience in conducting material tests. The tests involve subjecting the tiles to frequent cycles of soaking, freezing and thawing. The criteria for achieving a pass is stringent as the rigorous tests really push the tiles to the limit.

This technical data is for plain tiles only

Our current test results can be viewed via our website at www.heritagetiles.co.uk. We are proud of high pass rates our tiles achieve and encourage our customers to compare these results with other companies when making a product choice.

Recommendations

* Tiles to be laid in accordance with BS 5534 * Tiles laid to be drawn from a minimum of 3 separate pallets to ensure best effect * Tiles are delivered on non returnable shroud pallets * Pallets on site should be on firm, dry and level ground, no more than 2 pallets high * Due to limitations of the print process, colours should be selected from actual samples.

Quality Assurance

Heritage Tiles conforms to BS EN 1304:2005 and BS EN 5392:2103 and are manufactured under a Quality Management System, which meets requirements of ISO:9001 2008. Our materials and finished products are tested by our quality controlled staff at every stage of the production process.
